

## GYSPOT COMBI 230 E PRO

**New generation 2 in 1 dent pulling machine.**  
**The Gyspot COMBI 230 PRO allows dent pulling on both steel and aluminium car bodies. A new repair process using mono-point and multi-point traction saves time and increases profitability. This process does not require any disassembly or trim removal.**

### STEEL DENT PULLER ASSETS

**Only 2 parameters to select :**

- the output power level (amongst 11 levels)
- the tool which is used (amongst 7 tools)

=> **No need to select the welding current and welding time.**

**Automatic or manual triggering :**

**Automatic gun :** the welding is triggered automatically by a simple contact between the tool and the part to straighten.

**Manual gun :** the welding occurs when pressing the trigger when the tool is in contact with the part to straighten.

### ALUMINIUM DENT PULLER ASSETS

**Microprocessor control and digital display :**

- Adjustable voltage from 50V to 200V (with memory of last voltage displayed), or power level from 0 to 10.
- Stud presence detection.
- Double copper pad earth adapted on the gun.

**Technology :** powerful capacitive discharge technology to weld M4 studs on all AISI and AlMg aluminium sheets .
